Project handoff

START-CHECK-0017

Release checklist

ID	Item	Change (USD)
0017	Quickstart	-12.50
0042	Test files	0.00

Keep the zeros at the start of each ID, the minus sign in -12.50 and the zero amount 0.00. Check all three columns in the saved PDF.

Review notes

MIDDLE-CHECK-0042

Read the beginning, middle and end. A PDF can open normally even when a table column or the end of a long line is missing.

This short command is a layout example. You do not need to run it.

```
npm run build
```

Before sharing

Keep the Markdown for later edits. Give the PDF a clear name so it is easy to distinguish from an earlier draft.

After changing the source, save a new PDF and check that copy. An older PDF does not update automatically.
